Detailed Action

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (C.C.P.A. 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (C.C.P.A. 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (C.C.P.A. 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-16 are rejected under the judicially created doctrine of double patenting over claims of U. S. Patent No. 5,474,759 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

Art Unit: 1615

Both set of claims disclose essentially similar drug aerosols. Oleic acid ~~on as~~ the surfactant (col. 3, line 43) and alcohols (col. 3, line 36) are disclosed by USP 5,474,759.

The cited art is analogous because it pertains to the field of the inventor's endeavor and is also reasonably pertinent to the particular problem with which the inventor is involved. *In re Wood*, 202 U.S.P.Q. 171, 174. Note that a comprising-type language does not exclude other steps, elements or materials. *Cues Inc. vs. Polymers Industries*, U.S.P.Q. 2d 1847 (DC ND GA 1988). Moreover, (i) it is well established that the claims are given the broadest interpretation during examination; (ii) references are evaluated by what they suggest to one versed in the art, rather than by their specific disclosures. *In re Bozek*, 163 U.S.P.Q. 545 (C.C.P.A. 1969). No criticality of the concentrations of the ingredients has been established. No comparative data over the closest prior art demonstrating any unexpected results and/or improvements has been established. The claimed MDI and method are well known in the art and inherent to the disclosure of USP 5,474,759.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during

Art Unit: 1615

prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (C.C.P.A. 1968). See also MPEP § 804.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mr. Raj Bawa, Ph.D., whose telephone number is (703) 308-2423. The examiner can normally be reached on Tuesday through Friday from 7:30 AM to 6:00 PM.
